

LENNOX INTERNATIONAL INC.

Lennox is a leading global provider of energy-efficient climate control solutions for air conditioning, heating, and refrigeration. We deliver premium, trusted comfort to commercial buildings and homes around the world. Dedicated to sustainability and to providing comfortable and healthier environments for our residential and commercial customers—while reducing their carbon footprint—we lead the field in innovation with our cooling, heating, indoor air quality, and refrigeration systems.

130 YEARS OF INNOVATION

A Legacy of Firsts at Lennox. In 1895, the world's first riveted-steel furnace rolled off our assembly lines and we've been at it ever since —developing reliable, innovative heating and cooling systems to keep you comfortable.

OUR VALUES

We have built our business on a heritage of Integrity and Innovation dating back to 1895. Today, our core values: Integrity, Respect & Excellence, can be seen in every product we manufacture, and in our Lennox team and distributors who stand behind our products.

INTEGRITY

Makes others want to do business with us.

- Accountability
- Positive Engagement
- Trust

EXCELLENCE

Enables us to sustain elevated performance and profitable growth.

R-454B Refrigerant: is a blended, Low GWP refrigerant offering a balance between safety and environmental impact.

Corrosion Protection: Optional factory-applied corrosion coating available to enhance durability.

Lennox Quantum™ Coil: An aluminum alloy coil designed to resist corrosion and enhance performance.

Humiditrol+™: Dehumidification Technology designed for Lennox Model L, offering advanced control features.

Humiditrol: Dehumidification Technology delivers an effective way to remove moisture from the air.

AHRI: Certifies the product has been tested, guaranteeing that its performance and effectiveness are reliable and accurate.

ETL: Guarantees that the equipment complies with the electrical safety parameters.

R-32 Refrigerant: is a single-component, Low GWP refrigerant offering a balance between safety and environmental impact.

Inverter: adjusts the speed of the compressor to control the refrigerant flow rate, thereby consuming less energy.

AHRI: Certifies the product has been tested, guaranteeing that its performance and effectiveness are reliable and accurate.

ETL: Guarantees that the equipment complies with the electrical safety parameters.

R.410A: environmentally friendly Refrigerant.

Norma Oficial Mexicana: Certifies that the product complies with the safety and performance standards.

Built-In: Wifi module is integrated with the unit.
Optional: Wifi module is sold separately.
Tuya App: Wifi module is sold separately.
